

Cervical cancer can affect **Any Woman**

**Without early detection, cervical cancer may affect:
you | your sister | your mother | your daughter | and even your grandmother.**

Is it time for a pap or pelvic exam?

If it's been more than a year, you should schedule these quick exams through your doctor or specialist. Make sure all the important women in your life get checked, too.

By taking a few minutes for this test, you can make sure that you're okay.

Protect yourself—and your family. You'll be glad you did.
